**Task:** Design and developed overall process for managing financial transactions for partnership firms

**Achievements:**

- Worked independently and Explore new technology Angular 4 & Node JS for Web API
- Gathered requirements successfully and convert client's thought into a robust Web application
- Lead the development of a crucial and complex module
- Guided the team on various technical, design and functional aspects in development to promote reusability of the component developed

**Project - Cloud App, Greece****Role: Team Lead**

**Task:** Design and developed intermediate application that upload Data to cloud application

**Achievements:**

- Gathered requirements successfully and convert client's thought into a robust Web application
- Lead the development of a crucial and complex module
- Guided the team on various technical, design and functional aspects in development to promote reusability of the component developed

**Project - Time clock wizard, USA**

**Role: Senior software developer**

**Task:** Work on enhancements and technical support, parallelly Analyze current working system and upgrade it from 2-tier architecture to MVC architecture

**Achievements:**

- Successfully upgraded application to MVC
- Received Client appreciation for the critical project deliveries under stringent deadlines

**Tenure: Jan-2012 - Oct-2014(Including 5 month training)**

**Project - Online Pharmanet(Sales & Distribution), USA**

**Role: Senior Developer**

**Task:** Design and build process of sales & distribution according to US process

**Achievements:**

- Developed Chargeback module according to US norms
- Guided the team on various technical, design and functional aspects in development to promote reusability of the component developed.
- Received Client appreciation for the critical project deliveries under stringent deadlines

**Client - Loan Management**

**Role: Junior Developer**

**Task:** Worked on assigned development work

**Achievements:**

- Successfully developed application

**Project - Online Pharmanet(Sales & Distribution for Primary Sales), Mumbai**

**Role: Junior Developer**

**Task:** Task: Worked on enhancement & provide technical support

**Achievements:**

- Developed optimised collection process for Primary sales

**Certification**

---

- Certified Scrum Master
- AZ-900 - Azure Fundamentals

**Education**

---

Msc(C.A & I.T)

K.S School of business management, Gujarat University.
